

Dr. KHALID BANI-MELHEM

Research Associate Professor
Center for advanced Materials (CAM)
Qatar University
Doha, Qatar

Email: kmelhem@qu.edu.qa **Tel:** +974 4403 3994 **Mobile:** +974 60061088

□ Biography:

Dr. Khalid Bani-Melhem graduated from Jordan University of Science and Technology (JUST) with a BEng (Chemical Eng.) and a MEng (Chemical Eng.) in 1995 and 1998, respectively. His MEng research topic was on water desalination using membrane distillation technology. Dr. Bani-Melhem received his Ph.D. (Civil and Environmental Eng.) from Concordia University, Montreal-Canada in 2008. In August 2022, Dr. Bani-Melhem has joined the center for advanced materials (CAM) at Qatar University as a research associate professor. Prior to joining the Qatar University, Dr. Bani-Melhem has worked at the Hashemite University in the department of Water Management and Environment from 2012 to 2018 as assistant professor and from 2018 to 2022 as associate professor. Between September 2016 and September 2019, Dr. Bani-Melhem served as the chairman of the Water Management and Environment Department at the Hashemite University. Prior to joining the Hashemite University in 2012, he has worked at American University in Cairo (AUC) from Feb. 2010 to August 2012 as a Postdoctoral Researcher on a big project funded from King Abdullah University of Science and Technology (KAUST). Upon finalizing his PhD degree, Dr. Bani-Melhem also engaged in a post-doctoral fellow at Concordia University from 2008 to 2010 where he completed his research on his PhD project which was funded by more than 650,000 Canadian dollars from the Natural Sciences and Engineering Research Council of Canada (NSERC). His work from PhD was registered as a patent in 2010 in USA. Dr. Bani-Melhem's research interests are in the general area of physical, chemical and biological processes for water and wastewater treatments, specifically he focuses on membrane processes for water quality control and water reuse. Dr. Bani-Melhem published more than 50 papers in international refereed international journals and conferences. On the industrial scale, Dr. Bani-Melhem has a long and an excellent experience in chemical and environmental engineering fields. He worked as a process engineer and a quality supervisor at Arab Potash Company (APC) for more than 7 years. During his work at APC, he supervised on the quality systems (ISO 14000 and ISO 9000) in the company. He was the coordinator to build up these two systems at the company. For Building up ISO 14000, He participated to identify all the environmental aspects and their impact assessment on the environment.

□ Research Interests:

- Water & wastewater treatment and reuse
- Water treatment by electrocoagulation technique
- Membrane separation technology
- Water Desalination
- Quality and Environmental management systems (ISO 9000 and ISO 14000)

□ Key Qualifications:

- Extensive experience in environmental and quality management systems (ISO 9000 & ISO 14000).
- Background knowledge of membrane technology for separation and environmental applications, specifically for wastewater treatment and reuse.
- Experience in mathematical modelling and simulation of process data.
- Excellent laboratory experience in the analytical procedures for water and wastewater characterization including the following instruments: Atomic Absorption Analyser, Ultra Violet Spectrophotometer, Hatch Analyser, BOD test, COD test, DO meter, Zeta Potential Meter, Toxicity test, Fecal Coliform Membrane Filtration Test and Particles size distribution analyser

□ Education:

Institution	Date from – Date to	Degree(s) or Diploma(s) obtained
Concordia University, Montreal, QC, Canada	2003 – 2008	Ph.D. Civil and Environmental Engineering
Jordan University of Science and Technology-Jordan	1995 – 1998	M.S. Chemical Engineering
Jordan University of Science and Technology-Jordan	1990–1995	B.S. Chemical Engineering

□ PhD. Thesis:

Development of a Novel Submerged Membrane Electro-Bioreactor for Wastewater Treatment

□ MSc. Thesis:

Sensitivity Analysis of Membrane Distillation Processes

□ Language Skills:

Language	Reading	Speaking	Writing
Arabic	Mother tongue		
English	Excellent	Excellent	Excellent

□ Membership of Professional Bodies:

- European Membrane Society (EMS).
- International Water Association (IWA).
- Jordanian Engineers Association.

□ Editorial Work:**□ Assistant Editor: (Jan. 2022- August 2022)**

- The Jordan Journal of Earth and Environmental Sciences (JJEES)

□ Reviewer for the following Journals:

- Environmental Science and Technology (EST)
- Separation and Purification Technology (SEPPUR)
- Water Desalination and Treatment (DTW)
- Journal of Membrane Science (JMS)
- Environmental Science and Pollution Research
- Environmental Engineering and Science
- Water Research
- Chemical Engineering Journal
- Bioprocess and Biosystems Engineering.
- The Jordan Journal of Earth and Environmental Sciences (JJEES)

□ Courses Taught:

- Wastewater Engineering
- Water Quality
- Water Desalination

- Water Treatment Processes
- Membrane Separation Processes
- Industrial Wastewater Management
- Principals of Environmental Science
- Planning & Water Resources Management
- Solid and Hazardous Waste Management
- Scientific Research Methodology
- Advanced Environmental Pollution & its Treatment

□ Patents:

Wastewater Treatment System and Method (Submerged Membrane Electro-Bioreactor System). **2010**. United States Patent Application **20100051542**, (PhD work).

□ Honours and Awards

- Teaching Fellow Award, Concordia University-Canada (2006/01 - 2006/04).
- Dean Scholarship, Concordia University-Canada (2002/09 - 2006/08).
- Graduated Scholarship, Jordan University of Science and Technology-Jordan (1995/09- 1997/06).
- Excellence in Education Award, Jordan Univ. of science and technology-Jordan (1993/09 - 1993/12).
- Award of Ministry of Education, Jordan (1991/09 - 1995/06).

□ Professional Experience:

Date from – Date to	Location	Organization	Position	Description
August 2022 – Now	Qatar	Center for advanced Materials (CAM) Qatar University	Research Associate Professor	Conducting applied research related to water and wastewater treatment and reuse.
8/2018 – Now	Jordan	Faculty of Prince El-Hassan bin Talal for Natural Resources and Environment, The Hashemite University	Associate Professor	-Teaching graduated and under graduated students. -Conducting applied research related to water and wastewater treatment and reuse.
9/2016-9/2019	Jordan	Faculty of Prince El-Hassan bin Talal for Natural Resources and Environment, The Hashemite University	Head of the Department of Water Management and	-Prepare the department plan for the given academic year. -Response to the daily department requirements.

			Environment	-lead the department council for improving the academic policies.
9/2012 – 8/2018	Jordan	Faculty of Prince El-Hassan bin Talal for Natural Resources and Environment, The Hashemite University	Assistant Professor	-Teaching graduated and under graduated students. -Conducting an applied research related to water and wastewater treatment and reuse.
1/2010 – 8/2012	Egypt	Department of Construction and Architectural Engineering, American University in Cairo (AUC), Cairo-Egypt,	Post. Doc. Researcher	A principle researcher in a project funded by King Abdullah University of Science and Technology (KAUST) and the Sustainable Wastewater Management (SWM) Group in the Department of Construction and Architectural Engineering at The American University in Cairo. The main objective was to design a small membrane device which could be used for treating and reuse of grey water in arid and semi-arid areas.
10/2008 2/2010	Canada	Department of Civil and Environmental Engineering, Concordia University, Montreal, QC, Canada	Post. Doc. Researcher	A key researcher in a project which was funded to enhance nutrients removal from wastewater by membrane electro-bioreactor technology. The output results of the work were patented in 2010 in USA.
2/2004-2/2005	Jordan	Department of Chemical Engineering, Mut'ah University	Lecturer	Teaching different courses in chemical engineering including laboratories.
6/1998- 2/2004	Jordan	Arab Potash Company	Quality Supervisor	Supervision on the quality system (ISO 14000 and ISO 9000) in the company
6/1997-6-1998	Jordan	Arab Potash Company	Process Engineer	I worked as a chemical engineer on water treatment unit in the power

				station plant at Arab Potash Company (APC). The Power plant at APC was designed to produce steam for power generation. As a process engineer, my task was to ensure that the water used to produce steam is well treated through many treatment units before water enters to the boilers. Water desalination by membrane process (RO) was one of the operation units used to treat the inlet water to boilers.
9/1995-6/1997	Jordan	Department of Chemical Engineering, Jordan University of science and Technology- Irbid-Jordan	Research Assistant and Teaching Assistant	I assisted in teaching courses including laboratories during my Master program: Engineering Materials. Static. Water Pollution and Control. Water Pollution and Control Lab Numerical Methods for Engineers. Applied Differential Equations.

Woking experience abroad:

Position	Country	Date
Research Associate Professor Center for advanced Materials (CAM) Qatar University	Doha, Qatar	August 2022 – Now
Postdoc. Researcher , Department of Construction and Architectural Engineering, American University in Cairo (AUC), Cairo-Egypt,	Cairo, Egypt	February 2010 – Aug 2012
Postdoc. Researcher , Department of Civil and Environmental Engineering, Concordia University, Montreal, QC, Canada	Montreal, Canada	October 2008 – February 2010

□ **Funded project:**

Date from – Date to	Location	donor	Position	Description
1/2016–12/2020	Jordan	Scientific Research Support fund (SRSF) (~\$ 95,000)	Principal Investigator	A grant was funded to develop an innovative device for grey water treatment by integrating electrocoagulation technique with adsorptive materials
9/2007 – 8/ 2011	Canada	The Natural Sciences and Engineering Research Council of Canada (NSERC)	Post. Doc. Researcher	A grant was funded to develop a new wastewater treatment System and method (Submerged Membrane Electro-Bioreactor System). The method was registered as a patent in the United States of America in 2010 Patent Application 20100051542 .
1/2010 – 8/2012	Egypt & Saudi Arabia	King Abdullah University of Science and Technology (KAUST)	Post. Doc. Researcher	This project was in cooperation with King Abdullah University of Science and Technology (KAUST) and the Sustainable Wastewater Management (SWM) Group in the Department of Construction and Architectural Engineering at The American University in Cairo. The main project was to design a small membrane device which could be used for treating and reuse of grey water in arid and semi-arid areas.
2/2015-9/2015	Jordan	Jordan Oil Shale Company (JOSCO) (~\$ 2,500)	Project Supervisor	A grant was funded to enhance nutrients removal from wastewater by membrane electro-bioreactor technology.
2/2014-9/2014	Jordan	Jordan Oil Shale Company (JOSCO) (~\$ 2,000)	Project Supervisor	A grant was funded to investigate wastewater treatment by membrane bioreactor technology.
2/2014-9/2014	Jordan	Jordan Oil Shale	Project Supervisor	A grant was funded to investigate different

		Company (JOSCO) (~\$ 1,500)		adsorbent materials to improve wastewater treatment by electrocoagulation.
3/2013-9/2013	Jordan	Jordan Oil Shale Company (JOSCO) (~\$ 2,600)	Project Supervisor	A grant was funded to develop a new Wastewater Treatment System to treat gray water to be used in hotels and small communities.

□ Supervision on Master students:

1- Shatha Basil Rabaiah: (Co-supervisor)

- **Thesis title:** "Evaluation of Biokinetic Parameters for Fertilizer Wastewater Using Aerobic Oxidation".

2- Mahmoud Rsaoul Zaid Al-kilani:

- **Thesis title:** "An innovative environmental solution for coupling grey wastewater treatment and solid waste recycling at the Hashemite University using the electrocoagulation technology.

3- Mahmoud Al-Shorman:

- **Thesis title:** "A theoretical study of municipal solid waste characterization in Jordan and its economic feasibility"

4- Ahmad Eshdefat:

- **Thesis title:** "Detoxification of olive mill wastewater using integrated process of electrocoagulation and adsorbent materials"

□ Industrial Training Courses and Workshops:

- Registered Internal Audit Course about ISO 9000 / Organized by SGS-Yarsley ICS-UK, Amman.
- “Environmental Management System and Environmental Auditing According to ISO 14000 Standard”, held at Royal Scientific Society, Amman-Jordan, 20-23 August 2001.
- The main Concepts of ISO 14000 Documentation, Organized by Quality Consultants, Amman.
- Version 2000 of ISO 9000 Series Course/ Organized by Talal Abo-Gazaleh Center-Amman.
- Safety in laboratories. A training course was given to Qatar Petroleum employees between June 16 and June 19, 2012. AL Doha –Qater.
- Training Courses on ISO 9000 and ISO 14000. During my work at Arab Potash Company, many training courses on quality management system (ISO 9000) and Environmental Management System (ISO 14000) were given to many employees in different departments at Arab Potash Company, Jordan.

□ Supervision Activities:

- Supervision on graduated students (1 PhD student and 2 Master students) at the American university in Cairo

- Supervision on graduated students in the Civil and environmental engineering department at Concordia University (2 PhD students and 2 master students).
- Supervisor and coordinator for ISO 9000 project (Quality management system) and ISO 14000 projects (environmental management system) for about three years.
- Participation in Preparing for King Abdullah II award for excellent at APC company
- Participation Arthur Anderson Team in Re-Organization Structure for APC Company.

□ University, College, and Department Committees

- Member of University council (University, The Hashemite University)
- Coordinator of safety and environment committee (College, The Hashemite University)
- Coordinator and member in graduate studies committee (College, The Hashemite University)
- Coordinator of establishing students training program (Department, The Hashemite University)
- Member of scientific research committee (Department, The Hashemite University)
- Coordinator of supplying laboratories committee (Department, The Hashemite University)
- Member in graduate studies committee (College, The Hashemite University)
- Member of scientific research Committee (College, The Hashemite University)
- Member of amending study plan (College, The Hashemite University)
- ABET accreditation preparation committee (College, The Hashemite University)
- ABET accreditation preparation committee (Department, The Hashemite University)
- Member of scientific research Committee (Department, Mutah University)
- Member of social Committee (Department, Mutah University)
- Member of organizing committee to prepare for 22nd CAWQ Eastern Canadian Symposium on Water Research, November 2006 (Concordia University).
- Member of Conferences and social event committee (CAM, Qatar University).

□ Other Activities:

- The owner of the idea of Launching the Jordanian Water Day on March 20, 2018.
- Establishment of Water Quality Laboratory in the Department of Water Management and Environmental in Nov. 2018
- Establishment of Wastewater Treatment Laboratory in the Department of Water Management and Environmental in Winter 2019-2020.

□ Analytical Instruments skills:

- pH meter, Conductivity meter and DO meter.
- Atomic Absorption Analyzer.
- Ultra-Violate Spectrophotometer.
- Hatch.
- HLPC.
- Zeta Potential Meter.
- Toxicity test
- Fecal Coliform Membrane Filtration Test.
- Particles size distribution analyser
